

## Tyre Repair

Tyre Repair is an aerosol product that is used to instantly repair and inflate tyres without the need to dismantle them or use tools. Designed for both tubed and tubeless tyres. It allows hundreds of miles to be covered before a definitive repair. The latex used does not reduce the tyre's utility value. The pressure in the container is sufficient to inflate all types of tyres.

Follow manufacturer's instructions - see original label for info.

Observe the principles of safety and hygiene when handling the product.

### NOTICE:

The container is under pressure, do not expose to sunlight and temperatures above 50C. Do not puncture the empty container or throw it into a fire. Do not spray into open flames or on hot objects.

Keep away from sources of ignition - No smoking!

Keep out of reach of children. Use only in well-ventilated areas. Do not breathe fumes. If swallowed, seek medical attention immediately and show this container.

**WARNING:** Extremely flammable chemical!

First aid: In case of skin contact, wash off residues with soap and water. In case of contact with eyes, rinse immediately with plenty of water.

Dispose of the empty container at a municipally designated waste disposal site and dispose of the container with the rest of the product at a hazardous waste collection facility.
