

Mask DHH Certified - Acerbis

Mounting: see attached picture. B) how to attach the mask to the motorcycle using the spreader plates:

Screw the mounting plates (2) included in the mounting kit to the mask using the screws (3), washers (4) and nuts (5), attach the plates to the motorcycle using the four rubber bands (6) as shown in the illustration.

WARNING: Headlights and masks on off-road motorcycles usually wear out due to frequent shocks. Therefore, always check the headlights on your motorcycle first before riding after dark. Make sure that you have carried out the installation exactly according to the above instructions. If a headlight were to fall off, it could hit the front wheel, causing a serious accident that could lead to serious injury or death. Do not attach the cables with mounting straps to the number plate. Use the supplied leashes. Check that all cables, hoses are working properly before starting out. Rubber mounting tapes are items that will gradually deteriorate due to airborne pollutants. Therefore, always check them before you drive off. Never drive off if the headlights are not properly attached.

Dispose of the product environmentally at the end of its life.
