

## Putoline wash on air filter

Store in a well-ventilated place, preferably outdoors.  
Wear protective gloves and safety glasses when handling!

Use: Pour 3 litres of hot tap water into the container as much as possible, then add 100 ml of product. Submerge the contaminated filter completely in the solution and leave for 10-15 min. Afterwards, squeeze the filter several times. Repeat this procedure until the filter is completely clean. Wash the filter thoroughly in clean water. Let the washed filter dry under a piece of cloth in a well-ventilated place (preferably outside). When the filter is completely dry, you can treat it again with oil.

### WARNING:

Keep out of reach of children. Do not breathe the fumes. Avoid contact with skin.  
Harmful: may damage internal organs if swallowed. If swallowed, do not induce vomiting but seek medical attention immediately. Keep out of reach of children.

Dispose of the product environmentally at the end of its useful life.

Country of origin: The Netherlands
